Subject: RE: Schedule for Columbia Falls Aluminum Draft ARR

Denise, thanks for coordinating with us – we'd be happy to look ARR over and provide feedback.

FYI- The MPDES permit is out of the chute and will officially begin formal 45 day public comment on 2/18.

Subject: FW: Schedule for Columbia Falls Aluminum Draft ARR

Christine:

EPA plans to share its draft analytical results report (ARR) from the sampling they performed at Columbia Falls Aluminum Plant with us this Friday. I'll share the document as soon as I get it. I plan to finish my review by February 26th since I will be taking annual leave in March. I'm happy to incorporate any comments you might have on the document into one set of DEQ comments. I'll touch base with you once I've completed my review. If you don't have time to review the document, just let me know. Thanks!

Denise

Subject: Schedule for Columbia Falls Aluminum Draft ARR

Hi Denise,

I want to give you a bit of warning that the Draft ARR for the Columbia Falls Aluminum Smelter Site is scheduled to be sent over to me by next Friday. I'll be sending it to you electronically as soon as I receive it. If there are large files, I'll plan on using the MT File Transfer Service to get it to you.

We're trying to get the final report out by March 31st, as we've previously committed to Sen Baucus and Sen Tester to have the reassessment completed by the end of March. Assuming I receive the draft report and send it to you by/on

next Friday, I'm hopeful that if DEQ has any comments on the draft report that we could get those by March 14th? Let me know if that's not possible and we can rework the schedule.

Thanks,
Rob
